Title

The title of the paper should provide a concise statement of the contents of the paper. A good title is very important and will attract readers and facilitate retrieval by online searches, thereby helping to **maximize citations**. The title should include topical keywords and allude to the interesting conclusions of the paper. A title that emphasizes the main conclusions, or poses a question, has more impact than one that just describes the nature of the study.

Authors and affiliations

- Author names should be given in upper- and lower-case, not in all capitals, to avoid ambiguities. The author for correspondence must be clearly indicated. It is permissible to include the names of more than one author as corresponding author, but a single author must act as the point of communication during the peer review process.
- The name and address of the laboratory or laboratories and university where the work was done, and present addresses of authors who have since moved.

Corresponding author details

Detailed Author's address, including telephone number, Fax number and email address for the corresponding author should be mentioned.

Introduction

This outlines the state of current research and the context of the research presented. Often it will cover work previously carried out by the same research team and how the new results relate to that. Because the introduction states a lot of background material and little to no original research, it usual contains the bulk of the citations - often to larger "review" papers.
